## Year Group: 5

### Place Value

#### Place Value

Millions Period			Thousands Period			Ones Period		
Hundred Millions	Ten Millions	Millions	Hundred Thousands	Ten Thousands	Thousands	Hundreds	Tens	One
1	3	2	4	3	7	8	2	5

Count forwards and backwards in 1,000s, 10,000s and 100,000s up to 1,000,000.

Interpret negative numbers counting forwards and backwards

Round any number to the nearest 100,000, 10,000, 1000, 100 and 10.

315	→	<u>320</u>	Nearest 10
455	→	<u>500</u>	Nearest 100
1595	→	<u>2000</u>	Nearest 1000

Read Roman numerals to 1000(M)

I	1	XXX	30
II	2	XL	40
III	3	L	50
IV	4	LX	60
V	5	LXX	70
VI	6	LXXX	80
VII	7	XC	90
VIII	8	C	100
IX	9	D	500
X	10	M	1,000
XX	20	MD	1,500

### Number Knowledge

Know prime numbers and prime factors

**Prime Numbers up to 50**

Prime numbers are numbers that can only be divided by themselves and 1

2 3 5 7 11 13 17 19 23 29 31 37 41 43 47

Identify **multiples** and be able to find all factor pairs.

**Multiples** are all the numbers in a times table.  
Eg. The multiples of 2 are all the numbers in the 2 times table: 2, 4, 6, 8, 10 and so on.

**Factors:** Numbers that you can divide a bigger number by e.g.

Find the factors of 18

The factors of 18 are 1, 2, 3, 6, 9 and 18

This circle has multiples of 5

This circle has multiples of 6

where the circles overlap has common multiples of 5 and 6

Recognise and use squared and cubed numbers.

### Square number patterns

Square numbers get their name from the pattern they make.

Area = 1 x 1 = 1<sup>2</sup> = 1

Area = 2 x 2 = 2<sup>2</sup> = 4

Area = 3 x 3 = 3<sup>2</sup> = 9

Area = 4 x 4 = 4<sup>2</sup> = 16

See if you can continue the pattern!

### Calculation

Add and subtract any 1000s number from any 5-digit number.

$$\begin{array}{r} 58,391 \\ + 27,431 \\ \hline 85,822 \end{array}$$

8 <sup>7</sup>	16	.	3 <sup>2</sup>	10
- 1	9	.	0	4
6	7	.	2	6

Multiply numbers up to 4-digits by a 1-digit and 2-digit number using an efficient written method.

$$\begin{array}{r} 2826 \\ \times \quad 8 \\ \hline 22608 \\ 624 \end{array}$$

$$\begin{array}{r} 132 \\ \times 12 \\ \hline 264 \rightarrow \text{multiply by 2} \\ + 1320 \rightarrow \text{multiply by 10} \\ \hline 1584 \end{array}$$

Divide numbers up to 4-digits by a 1-digit number using short division written method.

	0	7	6	2
8	6	60	49	16

Multiply and divide by 10, 100, 1000

### MULTIPLICATION AND DIVISION BY 10, 100, 1000

- x 10 move digits one place to left
- x 100 move digits two places to left
- x 1000 move digits three places to left

- +10 move digits one place to right
- +100 move digits two places to right
- +1000 move digits three places to right

# Maths

## Year Group Year 5

### Shape

#### Perimeter and area

Can you find the missing lengths and calculate the perimeter and area?

#### What is Perimeter?

The perimeter is the distance all the way around the outside of a 2D shape.

#### Finding the Area (square)

To work out the area of a square, multiply one side by the adjacent side. The area of this square is  $6\text{cm} \times 6\text{cm} = 36\text{cm}^2$

### Nets

Cone	
Cuboid	
Hexagonal Prism	
Cylinder	

### Fractions, decimals, percentages

Write equivalent fractions and order fractions

Add and subtract fractions  
Multiply fractions by whole numbers

The right way

$\frac{1}{4}$	$\frac{1}{4}$
$\frac{1}{4}$	$\frac{1}{4}$

$$\frac{1}{4} + \frac{1}{4} = \frac{2}{4}$$

Convert mixed numbers and improper fractions

#### Convert Mixed Numbers to Improper Fractions

**FIRST** multiply denominator by the whole number  
 $3 \times 4 = 12$

**NEXT** add the product to the numerator  
 $12 + 2 = 14$

**LAST** The sum is the numerator. Keep the same denominator

How many thirds are in the whole number?  
PLUS how many thirds are in the fraction?  
TOTAL THIRDS =  $\frac{14}{3}$

Write decimals as fractions and percentages

Percentage	Fraction	Decimal
100%	1	1
75%	$\frac{3}{4}$	0.75
66.66%	$\frac{2}{3}$	0.66
50%	$\frac{1}{2}$	0.50
33.33%	$\frac{1}{3}$	0.33
25%	$\frac{1}{4}$	0.25
20%	$\frac{1}{5}$	0.20
12.5%	$\frac{1}{8}$	0.125
10%	$\frac{1}{10}$	0.10
5%	$\frac{1}{20}$	0.05
2.5%	$\frac{1}{40}$	0.025

### Measure

Converting measurements

**Length:**  
 $\text{km} \xrightarrow{\times 1000} \text{m} \xrightarrow{\times 100} \text{cm} \xrightarrow{\times 10} \text{mm}$   
 $\text{mm} \xrightarrow{\div 10} \text{cm} \xrightarrow{\div 100} \text{m} \xrightarrow{\div 1000} \text{km}$

**Weight:**  
 $\text{kg} \xrightarrow{\times 1000} \text{g}$   
 $\text{g} \xrightarrow{\div 1000} \text{kg}$

**Capacity:**  
 $\text{l} \xrightarrow{\times 1000} \text{ml}$   
 $\text{ml} \xrightarrow{\div 1000} \text{l}$

Which jug contains the most juice?

### Angles

- Acute** - Less than  $90^\circ$
- Straight Line** -  $180^\circ$
- Obtuse** - Greater than  $90^\circ$  and less than  $180^\circ$
- Reflex** - Greater than  $180^\circ$ , but less than  $360^\circ$
- Full Rotation** -  $360^\circ$
- Angles in a quadrilateral** -  $360^\circ$
- Angles in a triangle** -  $180^\circ$
- Angles around a point** -  $360^\circ$

<p><b>Reflex angle</b> A reflex angle is an angle that is bigger than <math>180^\circ</math></p>	<p><b>Obtuse angle</b> An obtuse angle is an angle between <math>90^\circ</math> and <math>180^\circ</math></p>
<p><b>Right angle</b> A right angle is an angle that measures <math>90^\circ</math></p>	<p><b>Triangles</b> The angles of any triangle will always add up to <math>180^\circ</math></p> <p><math>a + b + c = 180^\circ</math></p>
